

How SIMS can Support Safeguarding Arrangements

Date to be confirmed

Venue: Pound Lane Learning
Time: 9:30 am - 12.30 pm
MIDAS subscribers: £85
Non MIDAS subscribers: £105

Course overview

Schools and academies are required to clearly evidence the impact of their safeguarding and welfare responses for individual pupils and at risk groups. SIMS can provide the tools to help quickly identify patterns or changes in pupils' attendance, achievement and/or behavior, possibly indicating that a problem needs addressing. By being able to clearly evidence and assess the impact of your intervention strategy, schools can help keep pupils safe and provide a positive learning environment. A free half-day presentation, this course provides SLT with an overview of SIMS, what it is used for, and how you can use the data.

Learning outcomes

- Safeguarding Best Practice School Staff Checks / DBS
- Checks Behaviour Management and Exclusions Recording
- Pupils Well-being Agents and Agencies/Third Party Organisations
- Medical Conditions, Medicines and Best Practice
- Using SIMS User Defined Options (User Defined Groups, Fields and Lookups)
- SIMS Roles and Responsibilities
